

## ***Additional Info***

- Any person, company or organization that purchases or controls a pesticide is legally responsible for proper use, handling, storage, and disposal. Pesticide labels tell you how to properly discard the product. It is always illegal to bury or burn pesticides or their containers. It is also illegal to discard a pesticide or its container in a manner inconsistent with the instructions found on the label.
- If you have questions about the use, registration or condition of a pesticide, contact us at (406) 444-5400. It is helpful to have the product name, manufacturer, and EPA registration number found on the product's label.
- We do accept pesticides with a missing label or unknown pesticides. Large volumes of an unknown pesticide may require analysis before acceptance. You should be reasonably sure that the unknown material is a pesticide. Any information you can provide about the material is helpful.
- The program will only collect and dispose of unusable pesticides and their containers. We cannot accept fertilizers, waste oil, paints, or other non-pesticide materials.

## ***2016 Waste Pesticide Disposal Program***

**Sept. 20 - Malta**  
**Sept. 21 - Sidney**  
**Sept. 22 - Miles City**  
**Sept. 23 - Billings**

## What are waste pesticides?

Any pesticide (herbicide, insecticide, fungicide, etc.) that is unwanted or unusable as originally intended is waste. Pesticides become unusable when they have been improperly stored, become contaminated, if their uses and registration have been cancelled, or if the labels were lost or have become unreadable. The program also accepts empty metal pesticide containers as waste.

## How do I participate?

⇒ Complete a Montana Department of Agriculture Pesticide Disposal registration form. The registration deadline is **September 5, 2016**.

⇒ Registration Form:

<http://agr.mt.gov/agr/Programs/Pesticides/Environmental/Disposal/Forms/DisposalRegistrationForm.pdf>

⇒ Once pre-registered, you will be notified of the exact location and date of the collection.

⇒ The actual drop-off takes less than 15 minutes.

## How much will this cost me?

Cost is based on the weight of the waste pesticide and its container. Fees that are collected help pay for the program.

- The first 200 lbs. are FREE
- \$0.50 per pound for amounts over 200 lbs.

The Department may charge a higher fee to accept pesticides in pressurized cylinders or that contain dioxin or heavy metals.

## Cost Example

$$\begin{aligned} 50 \text{ gals.} \times 10 \text{ lbs./gal.} &= 500 \text{ lbs} \\ 500 \text{ lbs.} - 200 \text{ lbs. (free)} &= 300 \text{ lbs.} \\ 300 \text{ lbs.} \times \$0.50 \text{ lb.} &= \$150.00 \end{aligned}$$

Licensed pesticide applicators will receive a monetary credit when they participate in the disposal program.

## When and Where are the collection sites?

The Waste Pesticide Disposal Program is held annually in September. Four or five collection sites will be chosen, alternating in each of Montana's three waste pesticide disposal districts. Publicity will precede collections in each district.

Western Montana-September 2017

Central Montana-September 2018

Eastern Montana-September 2016

## Will there be any penalties?

**NO!** The disposal program is a non-regulatory service program that offers pesticide users the opportunity to dispose of unwanted and unusable pesticides in a safe and environmentally friendly way.

**Remember to  
Pre-Register!**
